Epic World - Cinematic Landscapes,

Is a versatile virtual instrument, perfect for composers and sound designers creating atmospheres for films, documentaries, video games, or new age music. Blending acoustic instruments with rich, imaginative textures, it takes you into a world of fantasy and emotion.

This library includes more than **350 carefully crafted instruments** and over **1,000 loops**, offering an extensive range of sounds to explore. Instruments like the **Bansuri flute**, **Persian Santur**, and **Elven Forest Flute** provide enchanting melodies, while the powerful **African drums** and **Bata drums** offer dynamic rhythm elements. For ethereal tones, use the **Crystal Chimes**, **Meditation Bells**, or the mystical **Shakuhachi** to add atmosphere and depth to your compositions.

Each evolving drone can feature **up to 8 layers**, allowing for endless possibilities in sound design. The sounds in **Epic World** are based on real acoustic sources, ensuring a natural and authentic quality. Whether you're designing expansive soundtracks or intimate, emotional moments, this instrument gives you the tools to enhance your projects with ease.

Epic World runs on the **Engine Player**, featuring powerful performance and exceptional timestretching. Thanks to the **lossless compression**, the library size is now reduced to 3.5 GB without sacrificing quality, providing an efficient workflow for modern projects.
