New Elastik Soundbank

Hannover / 30th-september-2010

Ueberschall announces the availability of Deep House

Deep House

A spiritual thing

This superb Deep House library is another new fascinating Ueberschall release which includes 24 Construction Kits providing 3.2 GB of full-range Deep House sounds and songs, taking its inspiration from sounds straight from the clubs around the world.

Each of the 24 Construction Kits delivers a well composed and professionally produced track (including a main part, variation, intro/outro and some Vocal addons). With a tempo range of 119 bpm to 127 bpm, and unique identities within production, you're sure to find the appropriate Deep House elements to suite your project needs. Everything has been designed to conform to the musical genre and the samples comprise a state-of-the-art library, made to achieve true Deep House sounds.

Content

A close look into the 3.2 GB package, finds more than 1100 loops and samples of supremely engineered instruments. Deephouse offers a massive variety of drum loops, synth patterns, voices, bass lines, chord progressions, atmospheres, percussion and fx sounds, which can be painlessly bonded to one another. BPM information and root key (key signatures) are embedded in all loop file names, streamlining the selection process.

Structure

Each complete kit contains up to 3 sub-kits and a drum single-sound folder, material is organized as follows:

- **Main Kit** - Includes the main theme, with its sounds and phrases.
- **Variation Kit** - Provides an alternative track and phrases which is used to add contrast to the main theme and gives you more flexibility for your entire track.
- **Intro/Outro Kit** - Here you can find the matching intro/outro track for the overall kit, along with its individual parts.
- **Single Drum Sound** - The single-shots are centralized in this folder, making it easy to create your own additional drum patterns.

The given structure and features like labelled key signature and tempo information provide a very easy way of arranging a whole song, including all the parts you need to make the perfect track.

Elastik

The whole library comes as an Elastik soundbank. The Elastik Player's DSP capabilities provide the right means to adjust the material to any production.

Credits

Responsible for this product are Marc Steinmeier and Ron Paul. They have worked for Companies like Universal Music, EMI Electrola and Sony/BMG to name a few. They have assisted, produced or remixed for well known artists such as LL Cool J, Alica Keys, George Clinton, Eminem to name a few. They gave a lot of productions their break in terms of Sound design.
