New Elastik Soundbank

Hannover / 08-november-2010

Ueberschall announces the availability of Nightshift

Nightshift

Natural chillout music

Ueberschall presents deep, smooth & laid-back construction kits for relaxing moods. The 18 construction kits deliver a perfectly designed amount of sounds and are professionally produced, composed and arranged. With a range of 059 bpm to 091 bpm any producer will be ready to create unique smooth tunes, lounge projects, radio & tv commercials, film cues and web applications of high quality. Integrate the library into your project to give the whole production a totally new style and touch of sound - no matter what genre.

Content

A close look into the 2.9 GB package, finds more than 950 loops and samples of supremely engineered and recorded instruments. High quality sounds, chilled acoustic and electric guitars, varied and inspiring drum arrangements plus the right fx sounds for the calm moments in music. BPM information and root key (key signatures) are also embedded in all loop file names.

Structure

Each complete kit contains up to 2 sub-kits (Main Kit & Intro/Outro Kit), some also contain variations.

Additionally the Elastik Player offers you a lot of DSP functions to adjust the phrases to further fit your productions / creations.
